

In this issue:

- Phases XI-XII: Understandings and Testimonials from the first students.
- EMF is being taught in a College in Israel.
- Kryon: a special message for the EMF Community.
- A nice story from Orlando, Florida.
- Two new EMF programs for 2009: The Lattice for Children and The Lattice for Families.

Phases IX through XII: The beginning of the whole story Giving birth to the New Human

"Our first IX-XII training in Sedona was attended by EMF Practitioners and Teachers representing 27 countries from all around the world".

"In Phases IX-XII, you will gain a deeper understanding of your Core Energy as the ultimate expression of your self, your "Infinite I". Let's look at the evolutionary path that led to the formation of these new phases.

In Phases I-IV, you learned about the Universal Calibration Lattice. In Phases V-VIII, you made conscious choices to practice the noble attributes of mastery in your daily life. Those choices created new energy patterns that continue to support you in your evolution.

In Phases IX-XII, you will further develop your ability to use the Third Lattice to manifest the energy of freedom within your being and your life. The dynamics of fission and fusion are used repeatedly to create a unique and powerful energy of evolution.

Phase IX: The Universal Human

You will focus on manifesting and managing your energy

"I am astonished by the remarkable new energies now present in the work that we have been building together!"

through the Third Lattice. What are you ready to achieve now?

Phase X: The Universal Parent

Fuse the energies of your Infinite I and become your own universal parent. This is a profound gift of wholeness/holiness for all generations.

Phase XI: The Universal Partner

Remember the guidance to "Love one another as you love yourselves." The energy of pure union generated within your Core (Infinite I)

and calibrated through your Lattice (Individual I) produces the consciousness of newly found self love.

Phase XII: The Emerging Evolutionary

The New Human living within the energetic transformation of the New Earth! With this profoundly new expression of self, you will know you have transformed, and you will be equipped with new tools to manage your evolution.

In the energy of love,

Peggy Schoenig Dubro

Some words from the first IX-XII students...

"What a most beautiful opportunity to evolve in a manner that is appropriate for each, as our Individual I (merges with) our Infinite I. These phases, nine to twelve, affect change in such a simple, quick, yet profound way. The phases have exceeded my grandest expectations of all that would take place!

The energy of focusing on what we desire, the ideal, is so wonderfully in synchronicity with the new energies on the planet. How could we not evolve toward higher dimensions? Thank you Peggy, Stephen, and your family for bringing the EMF Balancing Technique to us in the fullness that now exists..."

"So this is why we worked so hard practicing Phases I through VIII all these years. Wow! This is what peacefilled empowerment means. What

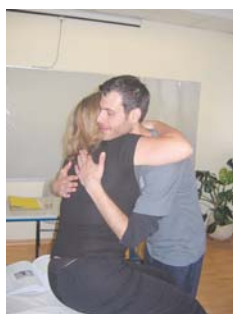

amazing tools for me as an Emerging Evolutionary! Thank you from deep in my heart Peggy and Stephen..."

"This class was a stunning completion to the EMF work and the promise of Phase XIII to come. I was more than satisfied! I am very excited about the future and our role in changing the consciousness of our world. Many of us have worked as much as 30 or more years for this "beginning moment"..."

"Phases IX to XII are truly unique. They are the next step or should I say leap in our evolution to wholeness. Those who make the commitment to receive these sessions are saying yes to all they can be..."

"For me this has been in answer to all my questions about everything I have read, heard or learned about the New Earth and the New Human working together one in one and empowering ourselves. First, doing all this work about my own process and then as I receive so much light, learning to give this incredible tool. Thanks to all this family for the work you have been doing ..."

Reidman International College for Complementary Medicine EMF in the classrooms of important college in Israel

The good news this time is coming from Israel. One of the most important Colleges in the country, the Reidman International College for Complementary Medicine, is now teaching the EMF Balancing Technique® Programs in their classrooms, as you can see in the pictures above.

The initiative belongs to Tamar Genisher, one of the most committed EMF Teachers in the Middle East. "Teaching in that college has been my vision and understanding for the last couple of years, and by practicing patience, trust and persistence I waited for the right timing to show

Tamar with Peggy and Steve.

up", said Tamar, who finally had the appropriate synchronicities and opportunity to start the EMF program under the Spiritual Psychotherapy & Healing Department of the College. The program is not only offered to the Reidman College Students as a Continuing Education option but also to the general public.

Today, the Reidman International College for Complementary Medicine is the biggest of its kind in Israel and belongs to a worldwide network of colleges. It was founded in 1988 and its seven branches, located in different cities of Israel, hold 4,000 students.

Very exciting News!!

Two new EMF Programs are going to be presented next year in Sedona: *The Lattice for Children* and *The Lattice for Families*. The dates are on the website (June 2009) and we will be delivering more information about them in the next editions of The Lattice News.

There's a new DVD available for Teachers and Practitioners. The *Support DVD* contains 8 segments in which Peggy lovingly speaks about different subjects of the EMF Balancing Technique®. Teachers are able to use this DVD in their classes and Practitioners may show it in talks and conferences. Check on the website where to get it in your country.

Accredited EMF Practitioner, tells 1st grade class about EMF!

Tatiana Blisshenko's daughter Katya is a student at an elementary school in Orlando, Florida. "Rub your hands" her mom said to the class "and feel something between your palms. This is your energy." The children were delighted to know such a thing!!! She

told a story about a beautiful and courageous American woman who was born with different brain abilities. Peggy Phoenix Dubro could see, feel and know things about the invisible energy field around people. As an adult she developed the EMF Balancing Technique®, and the work is done with the same movements in 70 countries all over the globe. She gave children a learning paper with Universal Calibration Lattice image, and she talked about Harmony, Balance and Joy, giving simple examples with movements. Creating a circle together, they also learned about the Third Relationship Lattice.

Message from Kryon: The Sacred Attributes of EMF

When Lee Carroll arrived that June morning at the Sedona Creative Life Center, he seemed excited. "Kryon told me that this will be a very important message", he said. Then he stepped onto the stage, turning on his recorder in preparation to be the first speaker at the 2008 EMF Worldwide Gathering. Indeed, the message was important. The message contains a list of guidelines and admonitions for EMF Teachers and Practitioners and explains why it is so important to maintain the EMF Balancing Technique® exactly as it was originated by its developer, our teacher Peggy Phoenix Dubro.

Kryon started with a metaphor and talked about laser light: a synchronous light that does not diffuse as it travels along a timeline. "So synchronous is it, that a pencil-thin point of light can travel

thousands of miles and still be pencil thin; that is because it is pure and it is in focus", Kryon said, and then invited to think of the EMF work as a laser light: "It comes from the source, which is Spirit, through a clear channel who is the teacher, Peggy. This light is then passed to the teachers without diffusion. The teachers then take it and pass it to practitioners without diffusion. Therefore, the final one who receives it for themselves, receives it in the same focus in which it was developed by the teacher, Peggy". However, Kryon said that there is opportunity for potential diffusion in the teaching steps that were mentioned. That is why the Technique is so carefully given and there is such integrity in the delivery of the information. "That's why it has taken

so long: to keep it pure, not diffused, and in focus", Kryon explained.

The core purpose of the message was to deliver a series of instructions for the EMF Teachers and Practitioners. There's not enough space in this Newsletter to bring the complete message, and Kryon specially asked not to alter the message in any way, so we strongly invite you to read the whole transcription from the EMF site; you will find it in the Reading Room. Enjoy it!
